

AJ Tech Research Labs Profile

AJ Tech Research Labs is a high-tech R&D company specializing in the design and development of IT solutions, Embedded products and algorithms for real-time GSM, GPS Tracking, RFID Solutions, Sensors, condition sensing devices, etc. that serve the needs of the Corporate and University in the Technology and to be the best Embedded Systems and IT solution Company to offer products, solutions & services in Electronics and IT fields by highly skilled Engineers with good knowledge. We are providing a Technology support to some Industries in Coimbatore and Trichy. AJ Tech is capable of transforming research results into practical implementation - the end result, new products for the mass market.

Our products

AJ Tech Research Labs started as a products company offering Lab solutions pertaining to Electronics department of Corporate and University.

We have successfully established in:

- Embedded systems
- IT Solutions (Web, Mobile applications, IOT)
- GPS vehicle tracking device and GSM
- Fuel Sensor automation
- Display Solutions
- RFID Smart Card Solutions
- 3D Printers
- Security Solutions

Our Vision

We have a strong vision to fulfil the customer requirements. In additions to constants innovation, sourcing of quality components, up gradation in terms of technology and tools, there must be a sustained relentless striving for all around quality in terms of both products and services.

Our Services

AJ Tech Research Labs mission is to transform the leading Embedded technology and the latest research findings into consumer products to benefit mankind. We mainly focus on optimizing investment on testing by deploying industry's most reliable technology solutions for real-time GPS devices, RFID Solutions, Sensors & condition sensing devices, etc. like unit, functional, performance and security. Also IT sector focusing on Web, Mobile applications and IOT.

Design & Development: We offers Design and Development services to customers with expertise in Embedded Technology Solutions, Display Solutions, Industrial & Home Automation.

Academic Training & Internship: We support students to explore and acquire knowledge of various industry standard tools and peripherals to make them Employable.
